

VHT® ENGINE METALLIC™

VHT® ENGINE METALLIC™ – Under hood engine dress-up never looked this good or stood up to high heat like VHT® ENGINE METALLIC™ paint. Formulated for high temperature and high performance applications, this unique metallic coating creates a cool aluminized effect and withstands temperatures up to 650°F. The VHT® ENGINE METALLIC™ formula contains ceramic resins that creates a tough, long lasting finish that is perfect for engines, engine accessories, transmissions, brake calipers, custom paint work or any other surface that requires a durable heat and chemical resistant finish.

Available in 4 colors:
